

ARUN PRASATH V

SENIOR .NET FULL STACK DEVELOPER | ASP.NET CORE | C# | SQL SERVER

Chennimalai, Tamil Nadu, India | +91 75984 16322 | arunprasathit2000@gmail.com
[linkedin.com/in/arunprasath-v-5538b3336](https://www.linkedin.com/in/arunprasath-v-5538b3336) | [arunprasath2000.github.io/arunprasath.v.Profile](https://github.com/arunprasath2000)

PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with **4+ years** of experience building enterprise web applications, RESTful Web APIs, and ERP integrations for procurement, supply chain, and workforce operations. Delivers end to end on **ASP.NET Core, ASP.NET MVC, and C#**, with JavaScript, jQuery, Bootstrap, and DevExtreme on the front end and tuned **SQL Server** stored procedures underneath. Built a multi-department Supply Chain Management platform, a real-time **SAP ERP-to-SCM** integration layer, and production mobile back-end APIs. Owns the full delivery cycle — requirement analysis, API and schema design, OWASP-aligned security hardening, IIS deployment, and post-go-live support — and contributes as a senior team member through code reviews and technical guidance.

TECHNICAL SKILLS

Backend: C#, ASP.NET Core, ASP.NET MVC, Web API, .NET Framework, RESTful APIs, Swagger / OpenAPI, ADO.NET, LINQ, Hangfire (Background Jobs), Postman

Frontend: JavaScript, jQuery, AJAX, HTML5, CSS3, Bootstrap 5, DevExtreme, DevExpress, Dynamic UI Grids, Responsive Web Design

Database: SQL Server, T-SQL, Stored Procedures, Views, Triggers, Indexing & Query Optimization, SQL Agent Jobs

Integration: SAP ERP Integration, Data Exchange APIs, SAP-SCM Data Flow, Bi-Directional Sync, REST / JSON Integration, Mobile Back-End APIs

Security: OWASP Top 10, Secure API Design, SQL Injection Prevention, XSS / CSRF Protection, Token Authentication, RBAC, HTTPS Enforcement, Input Validation

DevOps & Tools: IIS Hosting & Configuration, Git, Visual Studio, Release & Deployment Management, ELMAH Error Logging, Production Monitoring

Reporting: Power Query, Excel Automation, VBA, Automated Live Report Generation

Practices & AI: Requirement Analysis, Code Reviews, Clean Code, Cross-Functional Collaboration, Claude Code, Prompt Engineering, LLM API Integration, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Senior .NET Full Stack Developer

August 2022 – Present

SPARK IT Tech — Tiruppur, Tamil Nadu

- **Designed and delivered end-to-end enterprise modules** across the SCM ecosystem — procurement (Purchase Indent → Purchase Order → GRN), Project Module, Sample Development (ND & RD), and HR Portal — owning each from requirement analysis through production support.
- **Engineered bi-directional SAP ERP integration** keeping SAP and SCM consistent across the full procurement cycle, with automated error recovery, audit logging, and stage-wise reconciliation.
- **Designed and published ASP.NET Core Web APIs** consumed by the M-Force mobile application and browser-based clients, documented with Swagger / OpenAPI and secured with token authentication, rate limiting, and input sanitization.
- **Developed responsive front-end interfaces** with JavaScript, jQuery, Bootstrap 5, and DevExtreme / DevExpress — AJAX data grids, cascading dropdowns, dynamic forms, and modal workflows.
- **Hardened applications against OWASP Top 10 risks** — parameterized queries, XSS / CSRF protection, secure API design, role-based access control, and enforced HTTPS across all production modules.
- **Optimized SQL Server stored procedures, views, and scheduled jobs** to improve query performance and data reliability across high-volume transactional modules.
- **Owned the complete deployment lifecycle** — IIS configuration, environment setup, release management, and post-release production monitoring for business-critical applications.
- **Automated live SCM reporting** through a Power Query and VBA Excel module, replacing recurring manual data-extraction work for the Finance and Stores teams.
- **Contributed as a senior team member** through code reviews, coding-standard guidance, and technical walkthroughs, collaborating directly with Stores, Purchase, Finance, and HR stakeholders on requirements and rollout.

KEY PROJECTS

SCM — Supply Chain Management System | Lead Developer

4 Departments Unified

ASP.NET MVC · C# · SQL Server · Bootstrap 5 · jQuery · DevExpress · DevExtreme

- End-to-end procurement and inventory platform managing the full PI → PO → GRN lifecycle with real-time approval status tracking and document workflow.
- Consolidated Stores, Purchase, Finance, and Vendor operations into one secured platform, reducing manual procurement errors and improving material traceability.
- Tuned stored procedures, views, and scheduled jobs to sustain performance as transaction volume grew.

Project Module — Project, Sub-Project & Task Management | Full Stack Developer

Bi-Directional SAP Sync

ASP.NET Core · C# · RESTful APIs · SQL Server · jQuery · SAP Integration

- Built a hierarchical **Project → Sub-Project → Task** structure inside SCM, enabling project-wise procurement planning, task allocation, and cost traceability.
- Implemented **bi-directional SAP synchronization across every procurement stage** — project data pushed to SAP and returned into SCM at Purchase Indent, re-synced to SAP after Purchase Order, and closed back from SAP into SCM at GRN.
- Kept both systems reconciled at each stage through automated sync, stage-wise status updates, and failure handling — removing manual cross-system data entry.

Data Exchange — SAP ERP & SCM Integration | Backend Developer

Built From Scratch

ASP.NET Core · C# · RESTful APIs · SQL Server

- Built a secure middleware layer bridging SAP ERP and the internal SCM system, automatically triggering Project Request workflows on synchronization.
- Implemented retry logic, error recovery, and audit logging to maintain real-time data consistency and provide a complete transaction trail across both platforms.

M-Force — Mobile Ordering Back-End APIs | API Developer

Live in Production

ASP.NET Core · C# · RESTful APIs · Swagger / OpenAPI · SQL Server

- Developed and documented the REST API layer powering an online ordering portal — user authentication, product listing, cart management, order placement, order tracking, and payment integration.
- Applied API security best practices — token-based authentication, rate limiting, and request input sanitization — to prevent unauthorized access and data exposure.

Sample Development Module (ND & RD) | Full Stack Developer

Workflow Automation

ASP.NET MVC · C# · SQL Server · jQuery

- Built New Development and Re-Development sample workflows with multi-stage approval routing, quantity tracking, and stage-wise status monitoring.
- Replaced manual sample follow-up with a tracked digital workflow visible to all stakeholders.

HR Portal — Attendance & Workforce Management | Full Stack Developer

Company-Wide Rollout

ASP.NET Core · C# · JavaScript · jQuery · SQL Server

- Delivered employee attendance, check-in/out tracking, timesheet management, and leave application workflows with configurable multi-level approval routing.
- Implemented role-based dashboards and audit-trail logging for HR, management, and department heads.

Excel Export Module — Power Query Integration | Automation Developer

Manual Effort Eliminated

Power Query · VBA · SQL Server

- Automated extraction of live SCM data into structured, auto-refreshing Excel reports covering Purchase Indents, Purchase Orders, GRNs, and inventory records.
- Replaced a recurring manual data-pull process for Finance and Stores with one-click refresh against live production data.

EDUCATION

Master of Computer Applications (MCA)

2020 – 2022

M.P.N.M.J Engineering College, Chennimalai

Bachelor of Science (B.Sc.) — Computer Science

2017 – 2020

Dr. R.A.N.M Arts and Science College, Erode

Languages: English (Professional Working Proficiency) | Tamil (Native / Bilingual)

TECHNICAL ACHIEVEMENTS & RECOGNITION

Tech Innovation of the Year — 2025 · SPARK IT Tech — Company-level engineering award for technical innovation in enterprise application design and measurable contribution to core product development.

Workaholic Warrior — 2025 · SPARK IT Tech — Awarded for sustained end-to-end delivery ownership across multiple production modules and consistent release quality under tight timelines.
